

Installing HTH Hanging Bar

What You'll Need:

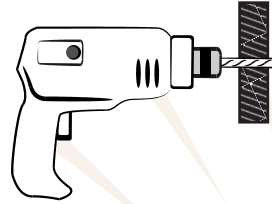

Hanging Bar (Included)
Wall anchors and screws (Included)
Pencil

Power Drill and 3/8 drill bit
Hammer
Phillips head screwdriver

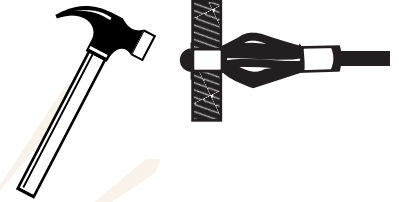

Installing the Hanging Bar

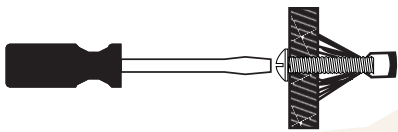

- 1** Place bar against the wall. Ensuring that it is level, mark holes for drilling.

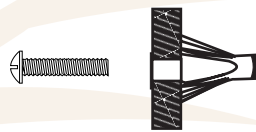

- 2** Drill hole through the wall at marked positions with a 3/8 drill bit.

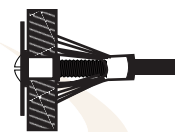

- 3** Insert the wall anchor with screw through the hole and tap until the head is flush with the wall.

- 4** Turn screw **CLOCKWISE** with phillips head screwdriver to expand wall anchor inside of the wall.

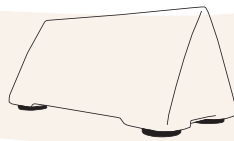

- 5** Remove screw by rotating **COUNTER-CLOCKWISE** with phillips head screwdriver.

- 6** Place hanging bar over wall anchors. Replace screws through the fixtures and tighten to secure hanging bar to wall.
